Portfolio: eryth.is-a.dev/portfolio

Core Skills

- C++
- C#
- Unreal Engine
- Version control with Git
- HLSL/GLSL
- Object-Oriented Design
- Godot
- Jira

Soft Skills

- Strong collaboration
- Quick learner
- Adaptable
- Good communicator
- Critical thinking
- Proficient with Microsoft Office

Interests

- Game modding
- Music production
- Graphic design

Profile

I'm a games development student, currently in my final year of a BSc (Hons) in Computer Games Application Development and looking for games and general programming roles. I have a strong foundation in C++/C#, good teamwork and collaboration, a love of many facets of games programming, and a desire to be pushed out of my comfort zone.

Education

SEPTEMBER 2022 – MAY 2026 (EXPECTED)

Computer Games Application Development BSc (Hons) | Abertay University, Dundee

Relevant: C++ Programming, Data Structures, Parallel Programming, Graphics Programming, PS5 Systems Programming

AUGUST 2020 – JUNE 2022

7x Highers | Williamwood High School, Glasgow

Relevant: English and Computing at Higher A, Maths at Adv. Higher A, Physics at Adv. Higher B

Experience

JANUARY 2025 – MAY 2025

Gameplay Programmer | Team Blood Box, University Project

- Worked in a multi-disciplinary team of 7, as a lead programmer of two, developing a narrative-focused puzzle game in Godot
- Developed core gameplay mechanics and user interface to designer specification with full controller support
- Helped maintain the technical design document to aid in consistency

JANUARY 2024 – MAY 2024

Gameplay Programmer | University Project

- Developed a 2.5D physics-based shooter for PS5 using an in-house framework in a team of 4 programmers
- Made use of ECS architecture and platform-specific features

DECEMBER 2024 – PRESENT

Unreal Programmer | Personal Project

- Developing a rhythm-based first-person shooter in Unreal
- Utilizing Blueprints for rapid feature implementation and tweaking, and converting to C++ for performance
